Córdoba, Argentina (2015 - 2020)**

Bachelor's degree in Architecture
and Urbanism

Languages

Spanish - Native

English - Advanced (CEFR C1)

Hebrew - Basic

About

I enjoy designing digital experiences for growing businesses, turning complex SaaS products into intuitive platforms.

I'm driven by turning complexity into clarity, and I'm constantly evolving how I work with new tools and workflows. I like working on fast-paced environments where things move quickly from idea to execution.

Work Experience

Product Designer - Inkod (Jun 2025 - Present)

- Design experiences for early-stage cybersecurity SaaS companies, from product discovery through scalable design systems.
- Transform complex security workflows into intuitive interfaces across attack surface management, automotive security orchestration, and threat intelligence platforms serving enterprise customers
- Partner with product and dev teams to rapidly iterate and validate designs using various tools, including vibe coding (Cursor & Claude).

Product Designer - Freelance (Jul 2024 - Present)

- Designed independently web and mobile interfaces for small businesses and startups, delivering live prototypes, and final UI designs.
- Developed full Design systems and brand guidelines
- Conducted user research and defined product flows to align design solutions with client goals.

Global Architect & Designer - Mindspace (Nov 2021-Dec 2024)

- Designed flex-office projects from concept to completion, traveling to sites, leading local architects, and collaborating with cross-functional teams to ensure alignment with business objectives and brand guidelines.
- I worked closely with the Real Estate team and the CEO to develop layouts, design guidelines, and establish 'Mindspace' standards for all locations.
- I have led projects across locations in Warsaw, Miami, New York and Israel.
